EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Cindy Kaplan on May 5, 2008.

The application has been amended as follows:

In claim 48, line 8, after the phrase "portion of the insert", please insert the phrase --, wherein an end portion of the holder block comprises an array of openings each having a diameter smaller than said plurality of openings in the holder block to expose a portion of the insert without exposing said end surface of the body --.

In claim 53, line 1, please replace "claim 52" with -- claim 48 --.

Please cancel claims 29-47, and 52.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The instant invention is distinguished over the prior art of record by a mask having a plurality of openings configured for exposing only a portion of an end surface of each of the working electrodes for forming the electrolytic surfaces on said exposed portions of the end surfaces of the working electrodes wherein the mask comprises a plate attached to a front surface of the holder block (claim 1); and an array of working

Art Unit: 1795

electrodes each comprising a body and an insert supported by the body, and a holder block for exposing a portion of the insert without exposing the end surface of the body (claim 48). The prior art of record neither teaches nor suggests the combination of limitations recited in the instant claims.

Donne teaches an apparatus for evaluating and optimizing electrochemical processes and for electrochemically characterizing materials comprising a base 10 (Fig. 1-3), which can be broadly interpreted as a mask. However, the base does not expose only a portion of the end surface of each of the working electrodes, since it exposes the whole end surface of each of the working electrodes as seen in Fig. 2 and 3.

Since the prior art of record neither teaches nor suggests the combination of limitations recited in the instant claims, one skilled in the art would not have been motivated to build the claimed system.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan V. Van whose telephone number is 571-272-8521. The examiner can normally be reached on M-F 9:30-6:00.
